National case law

Malta

This page provides you with information on Maltese case law.

Case-law

Presentation of decisions / Headline

Although keywords do not feature as a headline in the case law, there is a function in the national judgments application (part of the Legal Case Management system used at the Courts of Justice) whereby certain judgments deemed to be of interest are indexed. For example, a set of keywords together with a summary of the judgment is linked to the record.

One specific template is used for all court decisions, comprising the national coat of arms, court, judiciary name, sitting date, case reference number, litigants involved in the case (A vs B) followed by the actual text of the court judgment. The font, header and footer are also set within the template.
